Successful completion of a project includes (but is not limited to) a 10-minute presentation on your assigned topic before your peers and other interested faculty. Presenters are encouraged to make use of visual aids and electronic devices such as PowerPoint, Adobe Acrobat, Mathematica, the document camera, etc. Information written on the chalkboard should be kept to a minimum. Due to the number of topics, adherence to the 10-minute time limit is important. A 20% deduction in the grade for the presentation will be made for each full minute a presentation deviates from 10 minutes in duration. After each presentation, a short period will be given for questions from the listeners. The presentations will be conducted on Tuesday, November 29 and Thursday, December 1, 2011.
